London W4 4HS

Inflammatory Bowel Disease in Childhood

There are excellent sources of information online about IBD in childhood, in particular:

- The Crohn's and Colitis in Childhood Research Association (CICRA) <https://www.cicra.org/>
- Crohn's and Colitis UK <https://www.crohnsandcolitis.org.uk/>

We believe children with IBD are best cared for by the full multidisciplinary team that is available within a specialised NHS Children's IBD clinic such as that run by Dr Epstein and her colleagues at Chelsea and Westminster Hospital.

If you would like to arrange a private consultation for your child who has IBD or in whom the diagnosis is in question, or you would like his or her IBD care reviewed, please contact us to discuss this and we will be happy to help.

Dr Epstein greatly values your feedback and always strives to improve. She would really appreciate if you find a few moments to visit this link and leave a review of the care she provided to your child.
